Filter tremolo patch (#p2622)

by **Digital Larry** » Thu Jan 07, 2016 11:08 pm

One of the coolest things you can do with the fixed SVP block is to make a "tremolo" type sound using the crossfade block. The concept is tremolo but it sounds a lot like a flanger at times. Adjust the filter frequency and resonance to taste. I think you'll want to keep the resonance below 6 most of the time.

I love this one! Many variations possible.
