### Analog-ish Delay ? (#p3389)

by **man\_an18** » Tue Mar 05, 2019 1:23 pm

Hi. I'm experimenting with Spincad and trying to achieve an Analog sound like delay. I've tried with some filters in the feedback loop to make the repeats "darker". That's I think the simplest aproach, but i supossed it's not only about the filter.

Do you guys have any experience with this kind of delay?.

Thanks!

### Re: Analog-ish Delay ? (#p3391)

by **Digital Larry** » Wed Mar 06, 2019 6:46 am

Analog delays are characterized by reduced frequency response, possible aliasing, elevated noise floor, and possibly distortion (although clearly anything distorts when you clip it). However in my experience, most people asking for an "analog delay" out of a digital circuit are simply looking for that high frequency roll off.

You can try adding some modulation for extra "vintage" sound.  
But I agree that what people is usually looking for is for the darker repetitions.
