For the Mac laptop crowd... (#p2778)

by **culturejam** » Sat Jul 30, 2016 11:54 am

I couldn't figure out why I couldn't pull up the control panels for any blocks on my Macbook. Typically, for single-button trackpads like on a MacBook, you can click the pad while holding down Control to get a right-click action. But for whatever reason, this doesn't work in SpinCAD. Maybe it's something with Java in general.

Anyway, so if your'e on a Mac laptop, you'll need to plug in a 2-button mouse to access the block-level control panels.

Does this help?

FYI To generate a true Right-Click on a Mac, two finger click on the trackpad.

[http://stackoverflow.com/questions/2972 ... for-mac-os](http://stackoverflow.com/questions/2972...for-mac-os) (<http://stackoverflow.com/questions/2972512/how-to-detect-right-click-event-for-mac-os>)

Yes, the two-finger tap works as well. I'm very slow to come around to the whole "gestures" thing when it comes to UI. Never had an issue with control+click before now, but it's always nice to have options. 😊

I don't do very much testing on Mac. As in none recently.
