Installing SpinCAD Designer (#p1223)

by **Digital Larry** » Sun May 05, 2013 6:41 am

There's no installation program, but you do need to make sure you have the [Java Runtime Environment](http://www.oracle.com/technetwork/java/javase/downloads/jre8-downloads-2133155.html) (<http://www.oracle.com/technetwork/java/javase/downloads/jre8-downloads-2133155.html>) installed. Check the "OS Compatibility" topic in this forum.

For Windows users, get the "exe" Offline Installer version.

For Mac users, get the "dmg" Offline Installer version.

Linux Users - get the RPM version if your distribution supports RPM packages. I use "openJDK" on Ubuntu so there are other JRE/JDKL environments possible.

As of November 2015, SpinCAD Design is being compiled for compatibility with Java Runtime Environment 1.8.

After that you should download the JAR file from the "Release Announcements" folder. Extract from the ZIP file, then double click on this file and you should see the program open!

On Linux, and maybe even other OSes, you might have to go to the file's properties menu and choose the "Permissions" tab and select the checkbox which allows the file to be executed as a program. Alternatively, on the command line, you'd use "chmod +x filename" for you more experienced Linux users.

[Edit: It's the "SpinCAD Designer Releases" folder and can be found here: [viewforum.php?f=29](http://holycityaudio.com/forum/viewforum.php?f=29) (<http://holycityaudio.com/forum/viewforum.php?f=29>)]
